Here is my facilities plan needs for the media office at the TEA. Garth, as soon as we have a computer and phone line in an office, I'll let you know how soon we can get a PIO down to TEA to handle media drop-ins.

Sean, can we consider purchasing a small TV so that we can monitor media? It is essential we have a television to monitor TV coverage and adequately respond/correct misinformation. Last year we tried doing this remotely by assigning someone to it at the Columbia Tower. The feedback I received was inconsistent at best and led to a very embarrassing altercation between me and the news director who sent me the text to the audio to prove their coverage was fair and unbiased. Given the restrictions at the Admin Building, I have not pushed for TV reception in the past but I do feel like it is essential for me to do my job effectively. We do not need cable provided we get reception for our local networks.

Please let me know whom I can work with to make this happen for the Primary.

Thanks!  
Bobbie
