Attachments: Voter Data Request Form.doc

Keith,

Keep in mind that any inactive voter can simply show up at the polls and vote to go on active status. This could explain why you might see more people vote in a precinct than there are active voters in the precinct. Also, the state gives the counties 30 days after certification to address crediting issues and send them a report of voter IDs credited for the General so keep in the back of your head if/when you analyze the data. I'm sure we'll talk about these nuisances after Nov.7 especially if we have a recount in a close race. Let's all pray for wide margins of victory -- don't quote me.

I would think that we would want to burn a CD as close to election day that he wants it. You have to keep in mind the clean up and changes that are happening in the state database as well. We can burn the CD on the 6th if he wants it that close to the election. He just needs to give us a date. I attached the declaration and the cost of a countywide voter file is \$33.50.

Thanks.

Hi, Bobbie.

We would like to get a copy of the voter registration database before the Nov. 7 election and as close to the election as possible. Do you have a particular day you'll be providing those to interested parties?
